

TWINNING PROJECT FICHE

1 Basic Information

Programme: ENPARD MOLDOVA – Support to Agriculture and Rural Development (2014/034-128)

1.1 Twinning Number: MD16/ENI/AG/22

1.2 Title: Capacity Building of the Moldovan Agency for Intervention and Payment in Agriculture (AIPA) for the application of EU norms and standards for the administration of ARD support schemes

1.3 Sector: Agriculture

1.4 Beneficiary country: The Republic of Moldova

ACRONYMS

AA	Association Agreement
AIC	Agriculture Information Centre
AIPA	Agency for Intervention and Payment
ARD	Agriculture and Rural Development
ARDS	Agriculture and Rural Development Strategy 2014-2020
CAP	Common Agricultural Policy
DCFTA	Deep and Comprehensive Free Trade Area
EC	European Commission
EIB	European Investment Bank
ENI	European Neighbourhood Initiative
ENP	European Neighbourhood Policy
ENPARD	European Neighbourhood Partnership to Agriculture and Rural Development
ESRA	Economic Stimulation in Rural Areas
EU	European Union
EUD	European Union Delegation
GDP	Gross Domestic Product
HR	Human Resources
ICT	Information, Communication and Technology
IPARD	Instrument for Pre-Accession for Agriculture and Rural Development
MAFI	Ministry of Agriculture and Food-Industry
MCC	Millennium Challenge Cooperation
NDS	National Development Strategy
NAO	National Authorising Officer
NFSA	National Food Safety Agency
NGO	Non-Governmental Organisation
PSC	Project Steering Committee
RTA	Resident Twinning Adviser
UNDP	United Nations Programme for Development
USAID	United States Aid for International Development
WTO	World Trade Organisation

2 Objectives

2.1. Overall objective

To support the Ministry of Agriculture and Food Industry in improving its financial capability and governance to implement the agriculture and rural development policy objectives.

2.2. Project Purpose

Strengthening the institutional capacity of the Agency for Intervention and Payment in Agriculture to administer agriculture and rural development support measures in line with EU norms and standards.

2.3. Contribution to National Development Plan / Cooperation agreement / Association Agreement / Action Plan

On 27 June 2014, Moldova and the EU signed the **Association Agreement** including a Deep and Comprehensive Free Trade Area (AA/DCFTA). In support of implementation of the Association Agenda, the EU signed the Single Support Framework (2014-2017) with the national authorities allocating up to EUR 420 million with key priorities Public Administration Reform, Agriculture and Rural Development, Police and Border Police. Around 60% of EU Assistance to Moldova is implemented via Budget Support for which three actions were launched as part of the AAP 2014 for a total of EUR 131 million to implement the DCFTA (EUR 30 million), Public Financial Policy Reforms (EUR 37 million) and European Neighbourhood Programme to Agriculture and Rural Development (EUR 64 million). Besides these programmes the EU has ongoing budget support programmes in the field of Vocational Education Training (EUR 25 million), Visa Liberalisation Action Plan (EUR 21 million), and Economic Stimulation in Rural Areas (EUR 72 million). The total amount of budget support payments in Republic of Moldova for 2014 alone totalled EUR 79.5 million.

In the context of the Association Agreement, the Republic of Moldova committed to approximate its legislation in the relevant sectors with that of the EU, and develop its administrative and institutional infrastructure. The Association Agreement is a concrete way to take advantage of the very positive dynamics in EU-Moldova relations. It focuses on support for core reforms, economic recovery, governance, sector cooperation and the far reaching liberalisation of Moldova's trade with the European Union. The Agreement aims to deepen political and economic relations between Moldova and the EU, and to gradually integrate Moldova into the EU Internal Market – the largest single market in the world.

The DCFTA has considerable economic and geopolitical significance for Moldova. In particular, the DCFTA aims to include the Republic of Moldova into the European economic area, provided Moldova complies with substantial parts of the *acquis* in the areas of standards, quality infrastructure, sanitary and phyto-sanitary standards. This Agreement therefore opens great opportunities for the country, for both the market access for goods and services and the deep structural reforms favors for increasing the competitiveness of the Moldavian economy.

In addition the agriculture and rural development sector under the Single Support Framework (SSF) 2014-2017 is identified as one of the three priority sectors of intervention to be financed through the national envelope. The indicative financial allocation for the sector

under the SSF is 30% of the total amount. The overall objective that will be pursued in the SSF is to support Moldova to strengthen its economic, social and territorial cohesion in an environmentally sustainable fashion, development of rural areas, increasing the competitiveness of the agri-food sector through modernisation and market integration.

The recommendation of the latest Progress Report 2014 underlines that Moldova should focus its work in the upcoming year on continuing progress on sectorial reforms and bringing Moldovan law into line with the EU acquis to implement the AA/DCFTA.

Despite the importance of the agriculture and food processing industry as main contributor to the GDP of Moldova, the overall National Development Strategy of Moldova 2010-2020 does not specifically include among its seven priorities the agriculture-food sector. On the other hand, the Ministry of Agriculture and Food Industry has adopted a National Strategy for Agriculture and Rural Development 2014-2020 (approved by Government Decision No. 409 from 4 June 2014). The strategy identifies a number of priorities and measures to develop the agricultural sector and rural areas paying adequate attention to modernising Moldovan agriculture and food-processing sector. Attention is paid to the fundamental link between export potential and the necessary quality standards in food safety and environment protection. A detailed action plan for the implementation of the Strategy is currently under development.

The capacity of the institutions to implement the intended planning being still low, sectorial reforms are essential for the future development of the potential of the Moldovan agricultural modernisation and its approximation with the EU principles.

The proposed project will also contribute to important parts of the reform process described in the European Neighbourhood Programme to Agriculture and Rural Development (EUR 64 million), namely:

- To improve financial capability of the Government to achieve agricultural and rural development policy objectives;
- To promote agriculture and rural development policies and reforms;
- To improve governance in agriculture and rural development;

The concrete results expected to be achieved by the project relate to improved design and implementation of agriculture and rural development policies, notably with respect to institutional strengthening and capacity building of agriculture and rural development policy and implementation bodies.

3 Description

3.1. Background and justification

Agriculture remains a key sector of the country's economy, accounting for 13% of GDP, 50% of total exports and 28% of the labour force. Moldova is a rural country with 58% of the population living in rural areas. Agricultural employment in Moldova is still important but also declining in both absolute and relative terms. Fast structural changes in the economy have raised employment opportunities outside farming and have driven people out of rural areas. Due to increased job opportunities outside agriculture, a migration has started in two directions: from rural to urban areas and from local to foreign markets in search for better income.

In June 2014, the Government approved the 2014-2020 Agricultural and Rural Development Strategy (ARDS). This addresses gaps in rural development policy and supporting measures and raises changes in associated legislation and budget allocations. The Strategy will contribute to: a) the modernisation of the agricultural and agri-food sector, b) the improvement of living and working conditions in rural areas and c) the promotion of existing agri-food activities in harmony with the natural environment thus maintaining the biodiversity, cultural and traditional values for future generations. A detailed action plan for the implementation of the Strategy is currently under development.

The Ministry of Agriculture and Food Industry (MAFI) carries out the process of harmonization of national legislation with the EU acquis in a permanent and gradual way having already achieved some progress in this regard. The measures necessary to be taken by MAFI as a priority, in order to align with EU requirements, aiming to harmonize national legislation with the EU legislation as well to make structural changes in this area are set out in:

- a) Action Plan on implementation of the recommendations of the European Commission for establishing of the Deep and Comprehensive Free Trade Zone between Republic of Moldova and European Union, approved by Government Decision no. 1125 of 14.12.2010;
- b) Annual National Plan for Harmonisation of Legislation, approved by Government of Republic of Moldova in which EU acquis to be transposed into national legislation is specified (of which the largest part relates to the agri-food sector);
- c) MAFI's annual plan for harmonisation of agri-food legislation.

Subsidy mechanism in agricultural sector in Moldova does not have a special legal framework. By present, subsidies to agricultural producers are provided on the basis of the general legal framework, annual state budget law and other legal and normative acts approved by the Parliament and the Government of Moldova. The main legal acts that form the basis for establishment, budget allocations and payments of subsidies in agricultural sector are the following:

- Annual state budget law;
- Law No. 243-XV regarding subsidies for insurance of production risks in agriculture;
- Government Decision No. 60 from February 4, 2010 "Regarding creation of the Agency for Interventions and Payments in Agriculture"

The task on establishment of priorities for agricultural sector lays on the Ministry of Agriculture and Food Industry. The State Budget Law is the main document that sets the

allocation of financial resources, while the process of implementation (payments) of the subsidy mechanism is set in a Government Decision which is usually renewed and approved annually. The process of preparing the subsidy regulation is governed by the Ministry of Agriculture and Food Industry through a joint working group comprised of the heads of departments from MAFI, responsible for sub-sector policies and representatives of AIPA. The Regulation as such can be virtually divided in two parts: a) design of subsidy measures, including the nature for subsidies, amount of subsidies, criteria for disbursement and eligibility of applicants, and b) procedures for applications and set of documents to be provided with the applications.

At present there is no Managing Authority for monitoring, evaluation and preparation of the subsidy measures.

The Agency for Intervention and Payment in Agriculture (AIPA) is the main implementing institution responsible for sound and transparent administration of Subsidy Fund for agricultural producers. It is also currently performing tasks related to the development of agricultural policies. AIPA is currently co-responsible for drafting the annual support regulation which is then formally adopted by the Ministry. The role of AIPA must be clarified in terms of segregation of functions and duties to ensure that it is responsible solely for implementing functions.

Since its establishment, AIPA has operated with almost the same amount of staff, with a small adjustment in 2013, starting with 66 employees in 2010 and adding 8 employees only in 2013 (see table below).

AIPA staff dynamics

	2010	2011	2012	2013	2014
Central office	30	32	36	42	42
Regional offices	36	34	30	32	32
Total	66	66	66	74	74

Nevertheless, taking into account the increasing amount of funding during the years, the staffing of AIPA has not being adjusted accordingly to the requirements (see table below). In real terms, the amount of funding has increased by almost 4 times, while the staffing has remained roughly the same. This results often in overload of the personnel of the Agency, especially in the end of season period, when most of the applications for subsidies are brought in by agricultural producers.

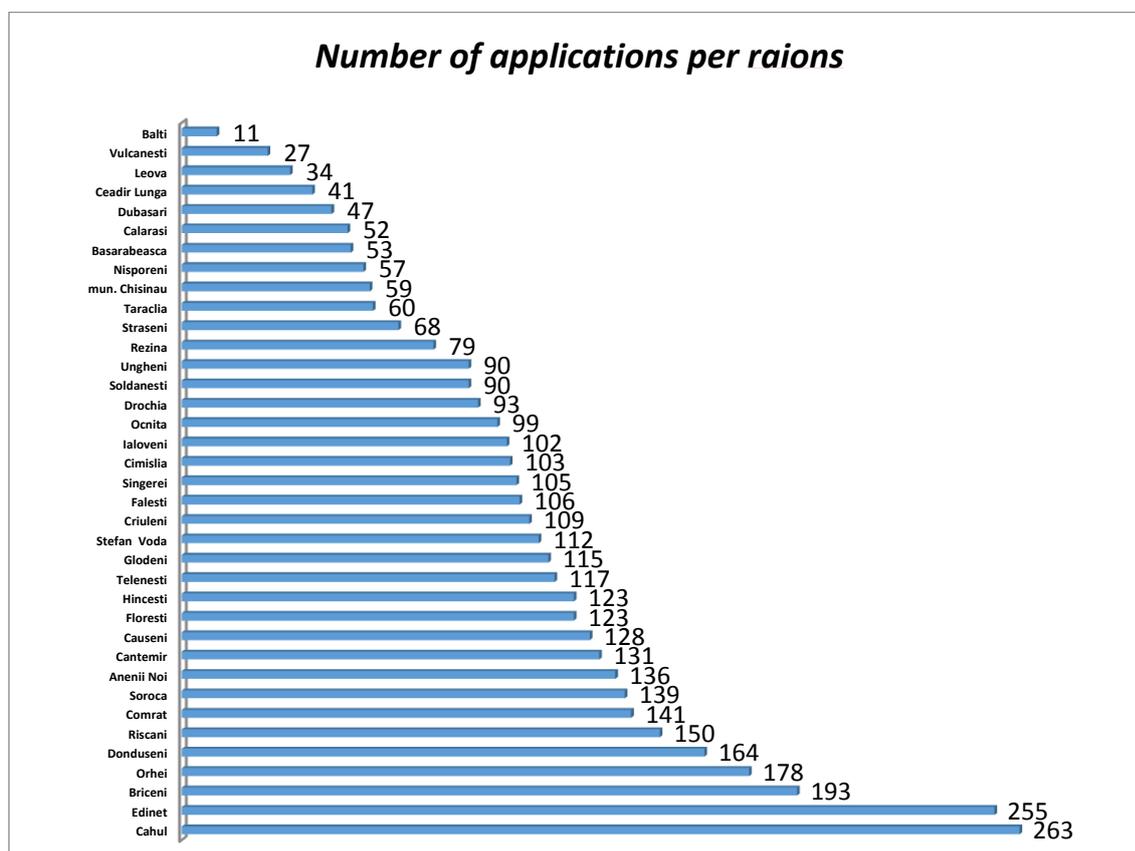

Evolution of Subsidy Fund, 000 MDL

	2010	2011	2012	2013	2014
Beneficiaries/applications	606	1088	4457	3957	5296
Requested amount, 000 MDL	20 801	226 066	605 369	497 343	882 980*
Disbursed amount, 000 MDL	20 800	195 419	551 080	448 284	543 966

* 2014 includes a negative balance due to insufficient funding

Additionally to the state subsidy fund, AIPA is managing a 10 million World Bank funded project “Moldovan Agricultural Competitiveness Project” which is designed for a period of 4 years beginning with 2013. Emergency support measures that have been provided by the Government in 2013 and 2014 were also managed by AIPA. In 2013, AIPA has implemented the drought mitigation support measure and in 2014 the “market loss” compensation. The emergency support measure in 2014 has added on top over 1000 applications that have been processed and paid by the Agency. The above mentioned activities bring additional work load to the Agency, in most of the cases resulting in delays in processing of the applications for funding.

For regional offices, the situation is almost similar. As it could be seen in the chart below, the activity of agricultural producers is not even throughout the country. In some of the regions (notably in the northern part) the number of applications for subsidies is few times higher than in other regions.

For the above mentioned reason, AIPA will need to revise its regional staff policy in order to adjust it to the actual flow of applications in each separate case.

AIPA is currently responsible for the following:

- Making calls for applications;
- Publicising the terms and conditions for the eligibility of domestic funding;

- The selection of applications to be funded;
- Inspections of selected applications pre approval.
- Contracting with successful applicants.
- Making payments to the beneficiary.
- Ex-post inspection of the projects funded in previous years.

The inspections are effected only at the stage of pre-approval of applications. This rule is applied due to the nature of support measures, which are based on the post investment principle. The ex-post inspections are foreseen as the contracts on subsidies (especially on investment projects) envisage the obligation of beneficiary to retain the goods subsidised for a period of 3 years. The ex-post inspections are not undertaken frequently due to lack of staff. Last inspections were undertaken in 2011. Out of 98 inspections performed, 15 had irregularities. Money was recovered from these projects. In 3 cases AIPA went to court to recover funds. Checks are undertaken to ensure that the expenditure declared has been incurred in accordance with applicable rules, the products or services have been delivered in accordance with the approval decision, and the payment requests by the final beneficiary are correct. These checks currently cover financial, administrative, technical and physical aspects of operations. Progress of projects implemented is not performed as investments are already completed at the time they are funded.

The nature of subsidy system currently in place is based on the principle of post financing, therefore there were no indicators set in the Subsidy regulation. However, the ENPARD Budget Support Project will have performance indicators; therefore AIPA will be obliged to incorporate the monitoring and evaluation unit in its structure. In case of ENPARD, annual evaluation missions on Budget Support will take place, and AIPA will need to provide the information of achievement of the indicators included in the Financing Agreement.

The Twinning project will need to ensure that AIPA's responsibilities and functions are approximated as a way of comparison with Annex 1 of the European Commission's draft Sectoral Agreement for IPARD II. Notably:

General Functions	Specific Functions	Management Structure		Operating Structure	
		NAO Support Office	National Fund	IPARD Agency	Managing Authority
Managing functions	Selection of measures				*
	Programme monitoring				*
	Management of IPA II accounts and financial operations		*		
	Evaluation				*
	Reporting			*	*
	Coordination				*

General Functions	Specific Functions	Management Structure		Operating Structure	
Paying functions	Authorization & control of commitments			*	
	Authorization & control of payments		(*)	*	
	Execution of payments			*	
	Accounting for commitment and payment		*	*	
	Debt management		*	*	
	Treasury		*		
Implementing functions	Selection of projects			*	
	Publicity			*	*
	Provide assurance on the effective functioning of the internal control system	*			
Audit functions	Internal audit	*	*	*	

Source: Annex 1 to the Sectoral Agreement on the arrangements for Implementation of European Union Financial Assistance to [IPA II Beneficiary] under the Instrument for Pre-Accession Assistance Policy Area Agriculture and Rural Development (IPARD)

Based on a detailed GAP analysis, AIPA has elaborated a road map for strengthening the capacities to meet the challenges it will face from the conditions and requirements related to the implementation of national and European Union funded support programmes.

In line with the GAP analysis and Road Map, AIPA has adopted an action plan containing the following main components:

1. Legislative Tasks
 - Elaboration and approval of a single pilot measure utilising EU like implementing procedures.
 - Establishment of Government Regulation for AIPA
 - Elaboration of a legal basis for the implementation of a comprehensive programme for agricultural rural development in line with EU requirements
2. Organisational structure
 - Establishment of AIPA's over-arching organizational structure in line with EU requirements.
 - Establishment of specific Units and functions within AIPA in line with EU requirements
3. Implementing functions

- Establish EU comparable systems for:
 - the selection of project applications for funding;
 - the authorisation and control of commitments and expenditure;
 - accounting of commitments and payments
 - Establish effective mechanisms for publicising the programme requirements, including enhancing stakeholder consultations
4. Procedural Issues
- Elaboration of a risk identification and management framework within AIPA
 - Elaboration of a strategic planning process within AIPA and the development of organisational performance objectives and the setting of key performance indicators.
 - Elaboration of a system within AIPA for the identification, handling and resolution of fraud and irregularities.
 - Elaboration of verifiable indicators for individual measures and the implementation of monitoring and evaluation provisions.
5. Human resources
- Elaboration within AIPA of a HR strategy and accompanying documents.
6. Information, Communication and Technology (ICT)
- Elaboration of an ICT Strategy and accompanying documents including security policy.
 - Elaboration of a document control and retention policy to provide for an audit trail.
 - Installation of appropriate security measures to the administrative, structure, staffing and technological environment of AIPA.

3.2. Linked activities

There is a large number of donors, both multilateral as well as bi-lateral, assisting Moldova in the field of agriculture and rural development. The most significant of these are: the European Union (e.g. ESRA sectoral budget support programme, Support to the use of biomass for energy - and EIB – Wine Sector Restructuring Programme), United States (USAID - Agricultural Competitiveness and Enterprise Development Project - and MCC – High Value Agriculture and Irrigation Infrastructure Reconstruction Programme) and World Bank (Rural Investment and Services Project and Moldova Agricultural Competitiveness Project). Most of these donor programmes and projects have a strong capacity-building and institutional-strengthening component that will undoubtedly contribute to the sector reform. A full list of international funded projects is provided in Annex 2.

The project will need to ensure co-ordination with the work of those projects as well as to ensure complementarity with other Moldovan public institutions, such as the Agriculture Information Centre (AIC) whose responsibilities and activities are linked closely to those for which AIPA will be responsible in respect of EU like funding mechanisms. The Twinning Project will need to work particularly closely and in collaboration with Technical Assistance project accompanying the ENPARD. In the case of those specific activities where there may

be an overlap of responsibilities, for example, in relation to Reporting and Publicity, joint inter-project working groups shall be established to ensure consistency in work undertaken.

3.3. Results

The Twinning Project should yield three overall results:

Result 1: New/updated organisational structure and of legal basis for AIPA elaborated

Indicators:

- Legal basis for the implementation of a Paying Agency functions by AIPA following the existing EU requirements drafted.
- Organisational structure and chart of AIPA, taking into account EU requirements and best practice such as the separation of functions and segregation of duties designed.
- Job descriptions for AIPA staff prepared.
- Human resource strategy for AIPA (incl. staff planning, recruitment, training and appraisal) elaborated.
- ITC strategy and security policy for AIPA, including wider connections with related responsible third parties elaborated.

Result 2: A comprehensive documentation covering all the functions of AIPA prepared

Indicators:

- Written procedures, manuals, guidelines and checklists elaborated for the implementation of approved Rural Development (RD) measures following EU principles prepared
- Control Plans for the RD measure to ensure AIPA's compliance with the management and control system requirements according to EU acquis elaborated.
- Training needs analysis (TNA) of the necessary skills required by AIPA for implementation of RD measures in line with EU principles designed
- Training programme with workshops, seminars, on-the-job trainings and Study Tours for employees of AIPA, including a programme for the training of trainers (ToT) developed
- AIPA staff trained to carry out their tasks according to the elaborated written procedures.

3.4. Activities

Component 1: Elaboration of an organisational structure and legal basis for AIPA in line with EU requirements

- Activity 1.1: Elaboration of a legal basis (Government Regulation) for the implementation of a comprehensive programme for agriculture and rural development in line with EU requirements.
- Activity 1.2: Drafting of AIPA's over-arching organisational structure with its specific units and functions in line with EU-like requirements.
- Activity 1.3: Elaboration of a comprehensive human resource strategy and accompanying documents for AIPA.
- Activity 1.4: Elaboration of a comprehensive ICT strategy, security policy and accompanying documents, for AIPA.
- Activity 1.5: Elaboration of security measures relating to the administrative, structure, staffing and technical environment of AIPA

Component 2: Preparation of a Comprehensive documentation covering all the functions of AIPA

- Activity 2.1: Elaboration of written procedures for all relevant functions and tasks of AIPA for the administration of RD measures in line with the principles of the EU.
- Activity 2.2: Elaboration of Control Plans for each RD measure to ensure AIPA's compliance with the management and control system requirements according to EU acquis.
- Activity 2.3: Training of AIPA staff members in the preparation and use of the elaborated written procedures.

Component 3: Capacity building and institution strengthening

- Activity 3.1: Strengthening of AIPA's Internal Audit Unit in line with internationally accepted audit standards.
- Activity 3.2: Elaboration of a risk identification and management framework.
- Activity 3.3: Elaboration of organisational performance objectives linked to the allocation of resources within AIPA.
- Activity 3.4: Design of a system for the identification, handling and resolution of irregularities and fraud.
- Activity 3.5: Elaboration of a system for the control and retention of documents.
- Activity 3.6: Strengthening of AIPA's payment and accounting units in line with internationally accepted standards.

3.5. Means / Input from the MS Partner Administration

3.5.1. Profile and tasks of the MS Project Leader

The Project Leader should be a high level civil servant with overall knowledge of issues related to EU Agricultural and Rural Development Paying Agencies. He/she should have sufficient authority to ensure that the Member State public administration supports the project and the RTA, with particular regard to the provision and preparation of short-term experts and financial administration. He/she should have a proven experience of project management as an asset and should be fluent in spoken and written English. The MS Project Leader will chair all meetings of the Project Steering Committee together with the BC PL. In case of bottlenecks and procedural problems in the project, he/she will act as facilitator to overcome such problems.

3.5.2. Profile and tasks of the RTA

General Profile:

- Be a civil servant or a staff member in an MS institution responsible for the implementation of agriculture and rural development funds
- University level education in economics/ agriculture/agriculture economics/rural development/law/ public administration or equivalent
- Excellent command of written and spoken English.
- Knowledge of EU Twinning as well as experiences as RTA or short term expert in at least one Twinning Project in the field of agriculture and rural development, would be an asset.
- Good interpersonal relations and communication skills
- Capacity to work closely in small teams and to cope with people of various professional experiences

Specific experience and skills:

- Minimum 7 years of proven working experiences within an MS Paying Agency or similar body in charge of implementation of European Agriculture Guarantee Fund (EAGF) and European Agriculture Fund for Rural Development (EAFRD) funds. Familiarity with Paying Agency accreditation requirements is considered as an asset.
- Knowledge of EU directives and best practices in the area of CAP.
- Having a clear overview of strategic and legal issues in CAP implementation on the national level and of related EU institutions and procedures. Being able to compare

different methodological approaches used in EU and accession countries and to evaluate their relative advantages and disadvantages for application in the beneficiary country.

- Proven experience of managing and monitoring group of experts and of working group facilitation.
- Experience of project (s) management in an international context would be an asset.

Tasks:

The RTA will be seconded to the Beneficiary Administration in Chisinau for the entire duration of the project _24 months. He/she will work closely with the Moldavian Project Leader and the RTA Counterpart to deliver the project as specified in the Twinning Contract. His/her active participation in negotiating the contract and establishing the Work Plan after the Project has been awarded is essential. The RTA will be responsible for the selection and supervision of the RTA Assistant and RTA language Assistant, if necessary, and the management of the short-term experts input while working in the Republic of Moldova. He/she will draft the quarterly and final project reports for the Steering Committee.

3.5.3. Profile and tasks of short term experts

Indicative

General Profile:

- University level education or equivalent professional experience of 10 years in an institution responsible for the implementation of agriculture and rural development policy and funds
- At least 8 years of proven professional experience in the area relevant to the proposed assignment.
- Working knowledge of English
- Computer literacy

Tasks:

Short term experts will perform their tasks in accordance with the project Work plan and their specific terms of references. They will transfer their knowledge via seminars, training sessions and workshops to counterparts and are able to adopt their working approach to the specific needs of staff from beneficiary institutions. Short term experts are reporting the results of their missions to the RTA and the Project Leaders.

4. Institutional Framework

4.1. The Ministry of Agriculture and Food Industry

The Ministry of Agriculture and Food Industry is the main governmental institution entitled with the mission to implement the functions of the Government of Moldova on "development, promotion and implementation of state policies on sustainable agricultural sector development, through increase of production and competitiveness of the sector, as well as ensure food security and food safety of the country". The functions of MAFI described in the Regulation of the Ministry include promotion of a balanced subsidy policy, using clear and transparent mechanisms of distribution of subsidies, as well as monitoring and supervision of the activity of the Agency for Interventions and Payment in Agriculture (AIPA). In this respect, one of the basic functions of MAFI includes establishment, monitoring and promotion of subsidy policies for agricultural producers, setting the main directions for support provided by the state, using financial means provided in the Subsidy Fund for agricultural producers.

Organisational Structure of the Ministry of Agriculture and Food Industry could be found on the following website – www.maia.gov.md

MAFI lacks technical capacity to develop a sound policy document based on impact analysis and clear priorities for development. This process is carried out difficultly due to the absence of a designated authority for monitoring, evaluation and development of the support measures.

4.2. The Agency for Interventions and Payments in Agriculture (AIPA)

The Agency for Interventions and Payments in Agriculture (AIPA)¹ has been established in 2010 aiming to implement agricultural support schemes for Moldovan farmers on one hand and to establish institutional structures necessary for the upcoming EU alignment process on the other hand.

AIPA is an administrative body under the Ministry of Agriculture and Food Industry, responsible for managing the financial resources aimed at supporting farmers, their distribution, monitoring and evaluating quantitative and qualitative impacts of state support measures.

AIPA organizational structure is comprised of its main office based in Chisinau and 10 regional offices covering the whole country, with the total number 74 employees. The Agency is managed by a Director and a Deputy Director. The Director of the Agency has in its direct subordination the Deputy Director and central apparatus, which includes the following departments: a) Audit department, b) Payments Authorization Department c) Accounting Department, d) Human Resource Department, e) Legal Department, f) e-Transformation Department, g) Field Inspection Department and h) Administrative Department.

¹ www.aipa.md

The Deputy Director has in its administration the following sub-divisions: a) Department for Administration and Control, b) External Relations Service and c) 10 Territorial offices.

5. Budget

The total budget for this Twinning Project is € 1.2 Million

6. Implementation Arrangements

6.1. Implementation Agency responsible for tendering, contracting and accounting

The person in charge of this project from the Contracting Authority is:

Ms Iva Stamenova

Project Manager on Agriculture, Rural Development and Food Safety

Delegation of the EU to the Republic of Moldova

12, Kogalniceanu Str;

MD 2001 Chisinau, Moldova

Tel. + 373 22 505210

Fax +373 22 545421

Email: iva.stamenova@eeas.europa.eu

The Programme Administration Office (PAO) will support the Twinning project implementation process together with the Delegation of the European Union to the Republic of Moldova.

The contact person is:

Director of Policy coordination and strategic planning

State Chancellery

Piata Marii Adunari Nationale, 1

MD-2033 Chisinau

Tel: +373 22 250 215

Fax: +373 22 250 259

6.2. Main counterparts in Moldova

6.2.1. Main Twinning Beneficiary:

Agency for Interventions and Payments in Agriculture (AIPA)

Address: 162 Stefan cel Mare ave. of.1505, MD-2004 Chisinau, Moldova

Acting Director General: Mrs Galina PETRACHI

Contact Person Ms Liliana MARTIN, Head of Department for International Relations

Tel. No.: +373 22 220 393

Fax No.: +373 22 794 200 27

Web-Site www.aipa.gov.md

6.2.2. BC Project Leader:

Mrs Galina PETRACHI

Acting Director AIPA
Tel. No.: (373-0 22) 210-194
Email: galina.petrachi@aipa.md

6.2.3. RTA - Counterpart

Mrs. Liliana Martin
Head of Department for International Relations
tel.(+373 22) 220-393
e-mail: liliana.martin@aipa.gov.md

6.3. Contracts

Only one Twinning contract is foreseen for this project.

7. Implementation schedule (indicative)

7.1. Launching of the call for proposal
February 2016

7.2. Start of project activities
September/October 2016

7.3. Project completion

The project will be completed 24 months after the official start of the project activities.

7.4. Duration of the execution period

The execution period of the contract (legal duration) shall enter into force upon the date of notification by the Contracting Authority of the contract signed by all parties. The execution period of the contract shall end 3 months after the implementation period.

8. Sustainability

The project is designed so that it improves the institutional capacity of the agricultural administration with the Ministry of Agriculture and Food Industry and its subordinated entities including the Agency for Intervention and Payment in Agriculture AIPA in order to enhance the administration of agriculture and rural development support schemes in line with EU norms and standards.

All project activities will be implemented based on best practices in Member States and be reported under a transparent approach and in a sustainable way. Web based working tools will be used during project execution. Main results of the project shall be published on the web site of AIPA as beneficiary of the project. All working documents elaborated during the life time of the project will be available for staff of AIPA beyond the project has finished.

9. Cross cutting issues

Environmental and gender issues will be considered in the measure fiches of the foreseen support measures.

10. Conditionality and sequencing

10.1. Annexes to project fiche:

1. Logical framework matrix in standard form
2. Detailed implementation chart
3. List of related projects
4. List of relevant Laws and Regulations

Annexes

Annex 1: Logical framework matrix
