

ANNEX 6 – FINDING PARTNER

In India: GITA's Matchmaking Tool

GITA has developed a web platform for online Matchmaking process to enable applicants to find a suitable project partner.

- Please visit the page <http://gita.org.in/Matchmaking.aspx>
- Interested applicants need to submit a matchmaking profile on this platform, providing the following information:
 - Brief description of the organisation
 - Core-technical profile of the projects
 - Core-technical profile of the desired potential partner
 - Upload presentation on project/company, if any
 - *Non-registered applicants/users are expected to register the organisations prior to submitting the Matchmaking Profile through simple registration process from the provided link*
- Applicants can access the database of registered profiles and identify potential R&D project partners for the project. Upon identification of suitable project partner, applicants can connect with them directly through portal. Please note – the Matchmaking profile listing may take some time for internal review and hosting on Matchmaking page.
- Please submit separate Matchmaking Profiles for each projects, in case the applicants are involved in more than one project.
- Applicants may tag their profile as Confidential in case they don't want to publish them on GITA public portal, such profiles will be referred by GITA team and its partners for suggesting suitable partner.

In Italy:

Please visit the search engine of innovative start-up and SME companies in Italy:

<http://startup.registroimprese.it/isin/home>
