

THE MINISTRY OF FOREIGN AFFAIRS OF ITALY IN NUMBERS

STATISTICAL YEARBOOK 2008

MINISTRY OF FOREIGN AFFAIRS
General Secretariat
Statistics Office

Foreword

From the ample and detailed analyses contained in the 8th edition of its Statistical Yearbook the Ministry of Foreign Affairs emerges as a highly dynamic one both in terms of the expanding breadth of its institutional responsibilities as well as growth in the types and volume of services offered. Also highlighted is its continuous support for the country system at European and world levels in the service of the internationalisation of the Italian society in all its various facets, along with the globalisation of the Italian economy. The numbers reveal a ministry heavily engaged in strengthening and enhancing Italy's international role - on both multilateral and bilateral levels - in the various sectors within its remit and in the distribution of a wide variety of services to citizens and businesses.

In describing how the ministry uses its available resources and means the Yearbook becomes an indispensable instrument for explaining and interpreting its international activities for the better understanding of citizens, the press, the business community and other governmental bodies and ministries. The wealth of statistics it contains bears witness also to the progressive introduction of elements of flexibility to the Ministry of Foreign Affairs and to a design for the gradual rationalisation of the diplomatic-consular network aimed at aligning its activities and services more appropriately with national interests and the geopolitical changes underway.

This analytic break-down of the data in terms of geographic criteria and the employment of time series analyses, in addition to offering a detailed but immediate and easy to read overview, allows for accurate comparison with the human and financial resources at the disposal of the foreign ministries of the other members of the G8 and their respective diplomatic-consular networks..

The usefulness of the Statistical Yearbook, both in paper and electronic form, is proof of the growing diffusion of statistical practices destined surely to be applied in other administrative sectors in service of the support and monitoring of the ministry's management and operational planning and the gradual development of benchmarks and performance indicators.

I would like to thank all those in Rome and abroad who contributed in a spirit of timely collaboration to the speedy collection and processing of data in order that the Statistical Yearbook could be published within a timeframe that would allow it to provide the maximum benefit to all those using it both inside and outside the ministry.

Chapter 2

Activities and Services

Introduction

This chapter gathers some statistics into a quantitative illustration of the various sectors of the Ministry's activities: International Affairs, Culture, Italians Abroad, Visa Services, Official Development Assistance, Communication and Information, Trade and Investment Promotion.

The **International Affairs** section contains data on visits by Heads of State and Government to Italy and those of the President of the Republic, the Prime Minister and the Minister for Foreign Affairs abroad. It refers also to the international Agreements concluded by Italy and other activities carried out by the Diplomatic Legal Advisory Service. One table presents data on foreign debt restructured/cancelled by Italy.

Figure 2.1 - Visits and meetings (national and international)

The **Culture** section contains data regarding Italian schools and Chairs abroad and scholarships awarded by the Directorate General for Cultural Promotion and Cooperation.

The **Italians Abroad** section contains data on consular registries, main consular services and Italians imprisoned abroad.

As of 31st December 2007 a total of 3 876 967 Italian citizens residing abroad were enrolled in consular registries, reflecting an increase of 5% as compared with 2006.

Figure 2.2 - Italian citizens enrolled in consular registries (2007)

The main consular services provided by our foreign offices have increased by 6% as compared with last year, and the number of civil status and citizenship certificates has gone up 11%.

It is interesting to note the number of interventions by the Ministry's Crisis Unit on behalf of Italian nationals in emergency situations (Fig. 2.3):

Figure 2.3 - Italian abroad: interventions by the Ministry's Crisis Unit on behalf of Italian nationals in emergency situations (2003-2007)

The **Visa Services** section contains detailed data on visas by geographical area and type. In 2007 a total of 1 519 816 visas to enter Italy were issued by authorised Italian representations (27% more than previous year). Figure 2.4 shows % distributions by geographical area:

Figure 2.4 - Visas to enter Italy by geographical area (2007)

Of all visas issued in 2007, 54% were for purposes of tourism, 12% for business, 14% for subordinate employment, 6% for joining family members, 3% for study and 2% for transit (Fig. 2.5).

Figure 2.5 - Visas to enter Italy by purpose (2007)

The **Official Development Assistance** section contains data on ODA by geographical area and to major recipients; data on debt restructured/cancelled by Italy; and data on scholarships granted to foreign students.

The overall amount of debt restructured or cancelled by Italy merits mention, as it confirms Italy's avant-garde stance on this international front. Peaks were recorded in 2005-2006 in debt cancellations through the HIPC (Heavily Indebted Poor Countries) initiative not only by Italy but the other Paris Club country members as well. The HIPC is now in the completion phase since: of the 41 countries eligible at the start of the initiative, 33 have already benefited from cancellation.

The **Communication and Information** section contains data on Press and Information Service - Office for relations with the public and Library and diplomatic archives users.

Figure 2.6 - Office for Relations with the public: encounters with the public (2005-2007)

The **Trade and Investment Promotion** section contains data regarding the facilities located abroad that are specifically dedicated to the treatment of economic and trade issues, to the promotion of the *Made in Italy* label and to support for Italian businesses abroad.

Particularly interesting are the data concerning the pilot "MFA-ICE sportelli" programme: a new approach to the logistical-functional integration of existing institutions, created with the specific objective of strengthening governmental support of the internationalisation of Italian businesses.

HIPC is now in the phase of completion: of the 41 eligible countries at the beginning of the initiative 33 have already had their debts cancelled.

Chapter 3

Comparative Data

Introduction

This chapter compares data regarding the human and financial resources of the Italian Ministry of Foreign Affairs with those of the foreign ministries of G8 countries and other European countries (Netherlands, Poland and Spain). Also compared are data concerning development cooperation activities, contributions to the United Nations, contributions to the EU budget and visas issued in the Schengen area.

This comparison of data as 31st December 2007 regarding the structures and resources of the Ministries of Foreign Affairs mentioned above shows that:

- the Italian **network abroad** continues to be very extensive, with the largest number of consular offices (110);
- Italy ranks last among the G8 countries for number of permanent employees, while it moves up one place for overall available human resources;
- Italy occupies fourth place, behind Germany, the UK and France in terms of foreign ministry budget (net of development cooperation funds), without considering the volume of the United States of America.
