1. Introduction

The Innovative Medicines Initiative 2 Joint Undertaking (IMI2 JU) is working to improve health by speeding up the development of, and patient access to, innovative medicines, particularly in areas where there is an unmet medical or social need. It does this by facilitating collaboration between the key players involved in healthcare research, including universities, the pharmaceutical and other industries, small and medium-sized enterprises (SMEs), patient organisations, and medicines regulators. IMI2 JU is a partnership between the European Union and the European pharmaceutical industry, represented by the European Federation of Pharmaceutical Industries and Associations (EFPIA).

With a €3.3 billion budget for the period 2014-2024, IMI2 JU is the world's biggest public-private partnership (PPP) in the life sciences. Half of the IMI2 JU budget (€1.638 billion) comes from Horizon 2020, the EU's framework programme for research and innovation. This will match €1.425 billion committed to the programme by EFPIA companies, plus up to €213 million that could be committed by other life science industries or organisations that decide to contribute to IMI2 JU as members or associated partners in individual projects.

The specific goal of the IMI2 JU is to develop next generation vaccines, medicines and treatments, such as new antibiotics. It will build on the successes and lessons learnt under IMI's first phase. It brings together companies, universities, public laboratories, innovative small and medium-sized enterprises (SMEs), patient groups and regulators in collaborative projects to pave the way for breakthrough vaccines, medicines and treatments to tackle Europe's growing health challenges, and secure the future international competitiveness of Europe's pharmaceutical industry.
